Scent Aire Breeze

PIEZO TECHNOLOGY SYSTEM

The **Scent Air Breeze Piezo Technology System** is Pall Mall's exciting new alternative to all other deodorising systems.

Benefits of the Breeze System include:

- No metal cans
- Less packaging – making it more eco-friendly
- Reduced carbon footprint
- No isobutane or acetone
- Lower operating cost – more product for the money
- Consistent fragrance from start to finish
- Two indulgent Scent Aire fragrances currently with more arriving soon
- Worry-free fragrance refills last up to 60 days.

Inside the Breeze Dispenser a ceramic piezo disc vibrates as electricity passes through, this propels the ultra fine Breeze fragrance particles into the room. The particles are only one micron in size and will stay airborne for up to two hours.

The Breeze System uses safer chemical formulations than traditional aerosol sprays, with lower, no added VOC. Dispensers can be placed in restrooms, hotels offices and school, improving indoor air quality. The air you breathe is better, making your surrounding environment much more pleasant.

Scent Aire Breeze

PIEZO TECHNOLOGY SYSTEM

Pall Mall remains on the cutting edge of washroom technology with its state-of-the-art Breeze Dispenser. The Breeze Dispenser can easily be set to spray every 5, 10 or 15 minutes. The dispenser's indicator light blinks green when operating, blinks red when the refill needs replacing, and goes dark when the batteries need replacing. Spray covers up to 800 cu m.

Scent Aire Breeze Dispensers operate on 3 AA batteries which typically last over 12 months. Batteries not included.
